## **Hartness International Interpack 2008 Press Release**

Hartness International Europe, best known for DYNAC pressure-less, rail-less accumulation systems and innovative case packers will introduce their new range of GlobalShrink Wrap equipment to the European market. Hartness International GlobalShrink Film Only Multipackers and Tray Former Shrinkwrappers bring innovation, precision, reliability and most importantly simplicity to shrink wrap packaging.

On show at Interpack will be a sixty cycle per minute Hartness International GlobalShrink Tray former shrink wrapper. This machine, assembled at the Hartness International European headquarters in Germany, is equipped for the European market.

The unique benefits of this GlobalShrink machine are efficient package change without tools, slow speed precision film cutting, long life film knife, lower maintenance, customized film wrapping section and a quiet, highly insulated energy efficient shrink tunnel. The rotary blank feed system, or the optional TOP PICK which feed blanks from the top of a stack, are available to make blank handling simple and repeatable regardless of the variable quality of the blanks..

See Hartness International on Stand # 8aC01.
